Market review

In November, a new episode unfolded in the bond market, exerting its influence on the equity market against the backdrop of a dynamically shifting global economic landscape. The equity market exhibited strength during this period, marked by the ASX 200 returning an impressive 5%, outpacing the global equity benchmark, which delivered a solid return of 4.3%. Spearheading this rally was the US market, with the S&P 500 outperforming the broad index by a significant margin of 3.5%. Confidence in the market was bolstered by interest rate-sensitive sectors, namely Real Estate (+12%), Technology (+11%), and Consumer Discretionary (+10%), as investors gained assurance in the trajectory of disinflation.

The global economic backdrop in November featured a delicate dance between reduced government borrowing estimates, shifting debt issuance strategies, and pivotal inflation data. The benchmark US 10-year Treasury yield, embarked on a downward trajectory, dropping 50 Bps in the first two weeks of November. This situation was exacerbated by a cooler-than-expected CPI print in mid-November, causing the yield to drop from around 4.6% to 4.4% bolstering the 3.2% November return from Global Fixed Interest. The unexpected comment from Christopher Waller, known for his hawkish views, hinting at the possibility of lowering the policy rate, added another layer of complexity. This unexpected comment not only contributed to a further 20–30 basis points drop in yields but also steered market sentiment towards anticipating more rate cuts from the Fed in 2024. The futures market is now pricing in five rate cuts from the Fed in 2024, representing a meaningful increase from the previous expectation of two cuts just a month ago. On the domestic front, the Reserve Bank of Australia (RBA) maintained the cash rate as expected in the December meeting, with Governor Michele Bullock emphasizing a data-dependent approach amid ongoing inflation uncertainty. Despite the RBA's persistent hawkish stance, the market foresees a softer monetary policy in 2024, driven by challenges in Australian households, including higher mortgage repayments, and considerations of global central bank shifts, especially the Fed. The futures market currently predicts a single rate cut in late 2024. Australian Fixed Interest returned a strong 2.97% return in November.

Over the past two years, the global property sector has been the worst-performing, experiencing a shift in market dynamics from a low to a higher interest rate environment. However, in November, global property witnessed a noteworthy jump of 5.64% as interest rates began to ease, alleviating financing costs.

Important information

*Past performance is not a reliable indicator of future performance. Performance is calculated before taxes, model management and platform fees and after underlying investment management fees. For full details of fees please refer to the relevant platform offer documents. Performance is notional in nature and an individual investor's actual performance may differ to the that of the model portfolio. Investment performance is shown from 01/03/23 and represents modelled performance only and assumes income received is reinvested.

The Morningstar Historical Corporate Sustainability Score is a weighted average of the trailing 12 months of Morningstar Portfolio Corporate Sustainability Scores. Historical portfolio scores are not equal-weighted; rather, more-recent portfolios are weighted more heavily than older portfolios. Combining the trailing 12 months of portfolio scores adds consistency while still reflecting portfolio managers' current decisions by weighting the most recent portfolio scores more heavily.

ESG pillar scores are displayed as a number between 0 and 100 with most scores range between 0 and 25. It is the asset-weighted average of the company environmental, social, governance risk scores for the covered corporate holdings in a portfolio. The scores measure the degree to which a company's economic value may be at risk driven by environmental, social, and governance factors. The risk represents the unmanaged risk exposure after taking into account a company's management of such risks.
