Market Review

September was one of the busiest months of the year, marked by significant monetary policy shifts. On September 18, the US Federal Reserve (Fed) initiated an interest rate easing cycle with a larger-than-expected 50 basis point (bps) cut, bringing the interest rate range down to 4.75%-5%. This "insurance cut" signalled a shift in the Fed's priorities from inflation control to supporting economic growth. The move, seen as pre-emptive, aims to protect the US economy from potential downturns.

In China, the government introduced a series of monetary easing measures toward the end of the month to support market liquidity, stabilise the housing market, and restore household confidence. These measures target deflationary pressures and aim to encourage spending, with Chinese households sitting on a vast RMB 130 trillion (US\$18 trillion) in bank savings.

Despite the Fed's rate cut, the US equity benchmark MSCI USA ended September down 0.13%, as concerns over a weakening US economy, particularly mixed labour market signals, offset the positive impact of the rate cut. In contrast, Chinese equities performed strongly. The China Securities Index 300 (CSI 300), which tracks the top 300 stocks on the Shanghai and Shenzhen stock exchanges, surged 19.65% in local currency, driven largely by a remarkable 15% gain in the final week of September—the index's best weekly performance in 15 years.

Global equities remained flat, with the unhedged global equity index returning just 0.03%. The hedged version, however, gained 1.83%, aided by the Australian dollar's 2.14% appreciation against the US dollar.

The Australian dollar's strength was supported by the Fed's rate cut and a sharp rise in commodity prices, particularly iron ore. The rate cut widened the spread between US and Australian 10-year treasury yields, while Chinese policy measures boosted iron ore prices, which jumped from \$89 to \$109 per ton in the final week of September. The Fed's rate cut also contributed to a 1.07% rise in global fixed income, while Australian fixed income saw a modest 0.31% gain.

The Australian equity market delivered a 3.07% return in September, driven by a 13.07% surge in the materials sector, which benefited from China's policy support for industrial metals. Health care was the weakest sector, with CSL falling 6.09% due to senior management changes. Supermarkets Coles (-2.1%) and Woolworths (-3.95%) also faced pressure amid growing concerns about price gouging.

Real assets continued their rally, with global property and infrastructure posting double-digit year-to-date gains. Global property rose 2.72% in September, outperforming global infrastructure (+2.1%), buoyed by the Fed's larger rate cut. A standout deal in the real assets sector was Blackstone and Canada Pension Plan Investment Board's (CPPIB) acquisition of Australian data centre operator AirTrunk for over AUD 24 billion, underscoring strong market demand for data centres amid AI advancements.

Important information

The Morningstar Historical Corporate Sustainability Score is a weighted average of the trailing 12 months of Morningstar Portfolio Corporate Sustainability Scores. Historical portfolio scores are not equal-weighted; rather, more-recent portfolios are weighted more heavily than older portfolios. Combining the trailing 12 months of portfolio scores adds consistency while still reflecting portfolio managers' current decisions by weighting the most recent portfolio scores more heavily. ESG pillar scores are displayed as a number between 0 and 100 with most scores range between 0 and 25. It is the asset-weighted average of the company environmental, social, governance risk scores for the covered corporate holdings in a portfolio. The scores measure the degree to which a company's economic value may be at risk driven by environmental, social, and governance factors. The risk represents the unmanaged risk exposure after taking into account a company's management of such risks.
